

TALC SPRAY ON RUBBER TUBE

TALC SPRAY ON RUBBER TUBE

Mitsuba offers Dusting unit for spraying Chalk / Talc powder on Green Rubber Tubes used in Automobile industry.

Chalk / Talc powder on rubber tubes acts as a dry lubrication in the processes like stacking, joining & curing.

Mitsuba's Electrostatic Powder Spray Equipment with Real Time Sieving system (patent pending) provides an even powder layer on green tubes. Automatic Dusting of talc makes entire production process easier, drastically increasing production rate. It also ensures dust free shop floor environment.

The system consists of a uniquely special powder spray system with specially designed Booth & Recovery unit with Filter cartridge system. All over sprayed chalk / talc powder is recovered as Filter cartridges ensures 100% powder recovery efficiency & efficient for recycling & reuse.
